SUMMARY

B.Tech undergraduate student in Computer Science Engineering with Machine Learning, possessing basic knowledge of programming, data structures, and core computer science concepts. Actively learning through coursework, projects, and hackathon participation, with an interest in understanding real-world applications of technology. Motivated to build technical skills, gain practical exposure, and grow as a beginner professional in the software and technology domain.

SKILLS

Programming Language Basics : C++, Python, HTML, CSS, Js

Computer Science Fundamentals: Object-Oriented Programming concepts, DBMS

Tools & Technologies: GitHub, Github Copilot, VS Code, Git

Soft Skills: Communication Skills, Teamwork and collaboration, Time management, Problem-solving mindset

PROJECTS

PulseAi [Link](#)

- **Pulse AI** is a premium AI-powered health companion web app that helps users manage their wellness through intelligent symptom analysis, medication reminders, mental wellness support, personalized fitness plans, healthcare facility discovery, and health analytics — all within a modern full-stack platform powered by Gemini AI.

KhetBuddy [Link](#)

- **KhetBuddy** is an AI-powered smart agriculture ecosystem built for Indian farmers, combining multilingual AI advisory, weather risk analytics, crop disease detection, mandi price prediction, and a peer-to-peer equipment sharing network into one unified platform. Powered by Gemini AI and modern web technologies, it helps farmers make data-driven decisions, reduce costs, improve productivity, and access scientific farming support in their local language.

HACKTHONS & EXPERIENCE

- Competed in Hack Days at Technocrats Institute of Technology, collaborating with peers to design and implement a practical technical solution within a limited timeframe.
- **Achieved Second Runner-Up in TechSprint 2025, a campus hackathon hosted by Google Developer Groups at Oriental Institute of Science and Technology, demonstrating strong problem-solving and innovation skills.**
- **Winner of 1 Hackathon and Finalist in 2 Hackathons, with participation in 8+ national and state-level hackathons.**
- Participated in Hack Overflow 9.0 organized by National Institute of Technology, Durgapur and a Web3 Hackathon hosted by Indian Institute of Information Technology, Nagpur, focusing on innovative problem-solving and emerging technologies.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning (AIML), Oriental Institute Of Science and Technology , Bhopal (GPA: 8.67) Aug '24 — Jul '28
India

CERTIFICATIONS

1. **Awarded a Design Patent for Assistive Solution for Visually Impaired, recognized by the Government of India.**
2. **Participated in Bootcamps on C++, Python, and JavaScript, focusing on programming fundamentals and hands-on practice.**
3. **Earned Google Certification in Generative Artificial Intelligence, gaining introductory knowledge of generative AI concepts and use cases.**
4. **Completed “Introduction to Internet of Things (IoT)” Certification by Cisco, in collaboration with NASSCOM.**
5. **Attended a 1-Week Entrepreneurship Skill Development Program, organized by MANIT–ROLTA Incubation Center in collaboration with Oriental Institute of Science and Technology, focusing on innovation, startup fundamentals, and entrepreneurial mindset.**

CAMPUS LEADERSHIP & COMMUNITY

1. Coordinated and managed activities as an **Event Manager at GI**, assisting in planning, organizing, and smooth execution of events.
2. Conducted a beginner-level **Generative AI workshop**, introducing participants to core concepts and practical applications.
3. Coordinated **Oriental Tech Hack 2.0**, managing event operations, participant engagement, team coordination, and smooth execution of technical activities.

4. Volunteered in **Cypher 30**, a 30-day coding challenge, assisting in event coordination and participant engagement.
